

World premiere: KraussMaffei delivers first machine from new main plant in Parsdorf

- First large machine fully assembled at Parsdorf plant
- Relocation of production in final phase
- Plant in Parsdorf with 250,000 m² of floor space goes into operation

(Parsdorf, April 14, 2023) The new main plant of the KraussMaffei Group in Parsdorf, east of Munich, has started up successfully: The first machine, a GX 451-3000 injection molding machine, left the plant bound for Edinburg (Indiana, USA). With the delivery of the first large machine produced in Parsdorf, the renewal of the plant landscape at KraussMaffei is almost complete after around three years. The relocation of the main plant and the corporate headquarters from the previous location in Munich-Allach to Parsdorf is one of the largest in the greater Munich area for decades. It is expected to be completed by the end of the current year.

The company had already commissioned a new production facility in Jiaxing (China) in 2020. This was followed by the opening of new plants in Einbeck and Laatzen near Hanover. The plant in Parsdorf, east of Munich, is by far the company's largest with 250000 square meters of floor space (equivalent to about 35 soccer fields). The previous main site in the Allach district of Munich will be vacated and abandoned by the end of the year.

Injection molding machines and machines for reaction process machinery and additive manufacturing (3D printing) are now manufactured in Parsdorf. In addition, Parsdorf is now also home to the Group headquarters, a large Customer Experience Center, the Group's largest spare parts warehouse, latest production technology and a new paint shop. In addition, automation (robots), which is currently still located in Schwaig, is to follow in the coming year.

Holger Ahlborn, Director Operations in Parsdorf: "I am pleased that the move to our new Parsdorf site is going very well so far and that we have already been able to deliver the first machine that has gone through all the

KraussMaffei - Pioneering Plastics

KraussMaffei is one of the world's leading manufacturers of machines and systems for the production and processing of plastics and rubber. Our brand stands for cutting-edge technology - for more than 185 years. Our range of products and services covers all technologies in injection molding, extrusion and reaction process machinery. In 2022, we expanded our portfolio to include additive manufacturing. With this broad spectrum of technologies, KraussMaffei has a unique selling point in the industry. With a high level of innovative strength, we ensure sustainable added value for our customers across their entire value chain with standardized and individual product, process, digital and service solutions. With our range of services, we serve customers from the automotive, packaging, medical and construction industries, as well as manufacturers of electrical and electronic products and household appliances, among others. KraussMaffei employs around 4,700 people worldwide. With more than 30 subsidiaries and over 10 production sites as well as around 570 trade and service partners, KraussMaffei has an international presence close to its customers. The company was founded in 1838 in Munich.

In April 2016, China National Chemical Corporation Ltd ("ChemChina") became the main shareholder of the KraussMaffei Group. In December 2018, ChemChina listed the KraussMaffei Group as KraussMaffei Company Limited in Shanghai. The listing opened up access to the Chinese capital market and local investors. Today, ChemChina is part of Sinochem Holdings Corporation Ltd, one of the world's leading chemical groups with over 220,000 employees.
